

# Md. Nazmus Sakib

## Sr. Manager - Frontend Developer

My career objective is to increase User Experience through the use of better technologies and ideas. I love to work with JavaScript and go an extra mile towards the core of JavaScript. I love the feature of ES6 and Typescript which are handy during development.

Apart from my daily job, I surf for latest technology and continue my study. I believe It's never too late to try a new things, as learning is a continuous process.
